## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, see pages 5-7, filed November 6, 2006, with respect to claims 13-17 and 19-24 have been fully considered and are persuasive. The rejection of claims 13-17 and 19-24 has been withdrawn.

### ***Claim Objections***

2. Claim 19 is objected to because of the following informalities:  
Claim 19 currently depends from cancelled claim 18.  
Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

3. Claims 20-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
4. Claim 20 recites the limitation "other subscriber" in line 20. There is insufficient antecedent basis for this limitation in the claim. Claim 20 will be allowable once this correction is made

***Allowable Subject Matter***

1. Claims 13-17 are allowed.
2. Claims 20-24 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

The prior art of record fails to teach establishing a communication connection between the subscribers via an intermediate provider in the communications system whenever subscriber end activation takes place, wherein the step of establishing a communication connection comprises (1) setting up a communication link between the subscriber and the intermediate provider, (2) signaling the stored ID numbers of the subscriber and the other subscriber to the intermediate provider, (3) setting up a communication link between the other subscriber and the intermediate provider, (4) signaling the stored ID numbers of the other subscriber and the subscriber to the intermediate provider, wherein the intermediate provider allocates a first neutral telephone number to the subscriber and allocates a second neutral telephone number to the other subscriber, and makes the each neutral telephone number available to the other subscriber, wherein a communication link is set up between the subscribers via the intermediate provider.
